After Congress leader Ram Gopal Yadav back to the Union Home Minister Amit Shah for laying the blame on the senior leader of the party's then leader of the country. The Congress, the world's largest political party, has always been fighting against corruption and other malpractices.

Bhajan Lal Sharma, the former chief minister of Chhattisgarh, took the oath of the new state's first tribal chief minister. The Union Home Minister Amit Shah, who was present at the ceremony, praised Sharma for his contributions to the development of the region.

The Congress' election push in 2024 is in line with its goal of making India a global power. The party is focusing on several key issues, including national security, economic development, and social welfare, to attract voters in the upcoming election.

The government has launched several initiatives to boost the economy, such as the Make in India program and the Digital India campaign. These efforts have been complemented by measures to enhance national security, including the creation of a National Security Council and the implementation of a new national security law.

NDMC Convention Centre, Sansad Marg,
India refuses to seek views on J&K Verdict: Me.Spokesperson

The Supreme Court on Wednesday has refused to seek views on the Jammu and Kashmir (Amendment) Bill, 2023, which was introduced in Parliament on Tuesday. The bill, which seeks to devolve more power to the Jammu and Kashmir administration, has been referred to the Standing Committee for examination.

The Ministry of Home Affairs submitted a memorandum to the government on Tuesday, seeking views on the bill. However, the government has decided not to seek views on the bill, citing the Supreme Court's refusal to refer the matter to the Jammu and Kashmir (Amendment) Bill, 2023.

The bill seeks to give more powers to the Jammu and Kashmir administration, including the power to make laws in certain areas, to promote economic development, and to control the finances of the state. The bill also seeks to create an autonomous body for the development of Jammu and Kashmir, which will be headed by an administrator appointed by the central government.

The government has stated that the bill is necessary to ensure the development of Jammu and Kashmir and to improve the governance of the state. However, the bill has faced opposition from the Jammu and Kashmir government, which has stated that the bill is unconstitutional and violates the provisions of the Constitution.

The Supreme Court has also refused to refer the matter to the Jammu and Kashmir (Amendment) Bill, 2023, citing the need for a comprehensive review of the bill's provisions. The government has stated that it will consider the views of the Jammu and Kashmir government before finalizing the bill's provisions.

The bill is likely to be referred to the Standing Committee for further examination, before being introduced in Parliament for its passage.
WILL RISE TO PEOPLE’S EXPECTATIONS: CM VISHNU DEO SAI

Mohan Yadav Takes Oath as MP CM

Prime Minister Narendra Modi has administered the oath of office to Mohan Yadav on Wednesday at Rashtrapati Bhavan.

In a cabinet meeting also today, he added: "I am happy to announce that the Congress as an Opposition also stood up to the challenge and took the oath of Assembly member."

Meanwhile, Prime Minister Narendra Modi has also administered the oath to the 11 new Members of Parliament elected from Jharkhand.

Vishnu Deo Sai said: "We have also taken the charge. We will work for the development of the state.

"The people of Chhattisgarh have given the Bharatratna Party, led by my party, a clear mandate in the elections of the past.

"Tomorrow, we will hold a cabinet meeting also, he added.

Deependra Lohar and former Union Minister Ashok Srinivasan also took the oath on Wednesday.

We have seen red ferris, grenade launchers, pumps and gratings.

Vishnu Deo Sai on Wednesday said the Congress is a party that always stood up to the challenge and took the oath of Assembly member.

Deependra Lohar and former Union Minister Ashok Srinivasan also took the oath on Wednesday.

Deependra Lohar and former Union Minister Ashok Srinivasan also took the oath on Wednesday.
**O**

On December 13, 2001, a tragic incident occurred in India’s Parliament, which has forever changed the course of Indian politics. Five terrorists, guided by Pakistan-based Musharraf, killed the lives of at least nine individuals, including six security personnel, two Parliamentarians, a police officer, and a gardener in an attack on India’s Parliament. The ensuing chaos saw the heart of New Delhi, the heart of India’s governmental machinery, under attack. This event, which occurred on the eve of India’s Republic Day, underscored the challenges and risks faced by the nation’s elected representatives and the Indian security forces.

**WHAT HAPPENED ON 26/11**

Around 11:30 am on December 13, 2001, a security breach was detected at the Parliament Complex in New Delhi, India. Armed with weapons, five militants, dressed as common commuters, entered the premises via VIP cards with a red beaded string. They had completely breached the security during 40 minutes prior to the attack. The breach occurred around 11:00 am. The Parliament adjourned, with Prime Minister Atal Bihari Vajpayee and Opposition Leader Sonia Gandhi leaving the premises, ensuring that only a few of the 100 MPs, including Hosteller L.K. Advani and others, were inside.

The militants’ car bomb targeted the East Gate, which the Prime Minister, Atal Bihari Vajpayee, entered daily. The bomb exploded, killing already departed. Most MPs and ministers were inside. The security breach unfolded at the Parliament complex.

**WHO ATTACKED IN-DIA’S PARLIAMENT?**

The Parliament attack was carried out by Pakistan-based Jashan Mohammed (Jash) Geelani (91) and Abdul Rehman Taliq (30), who trained the five militants for the plan.

**WHAT AFTER THAT ATTACK?**

Following the attack, the Delhi Police special cell solved the case within 72 hours. The investigation disclosed that the five suicide squad terrorists were Pakistani nationals affiliated with Lashkar-e-Tayyiba (LT) and Jaish-e-Mohammed (JeM).

Legal consequences included the arrest of Musharraf Al Afzal Guru (MARA), former ILEP Militant, who had surrendered himself at the main entrance to the Parliament chambers. The terrorist objective was to enter the building and indiscriminately target the crowd of MPs and ministers. Although the death toll was significantly higher than the expected 50% compared to events like the 2001 Mumbai attack, this incident was significant in terms of the boost it gave to the Indian democracy.

The breach exposed major security gaps in the complex, prompting the government to make substantial investments in enhancing security in the site. The investigation linked Abdul Rehman Taliq, Musharraf Al Afzal Guru, JeM outfits, and the JeM network.

Following the attack, several measures were taken to prevent future attacks in the building. The terrorists were identified, and rewards were offered.

**WHAT WAS THE IMPACT OF 26/11 MUMBAI TERROR ATTACK?**

The 26/11 Mumbai terrorist attack marked the beginning of a new era in India’s history. The attack had a significant impact on Indian politics, economy, and security. The attack underscored the challenges faced by the Indian security forces and the need for increased security measures.

**THE INDIAN PASSPORT VEHICLE SALES REACHED THE ALL-TIME HIGH IN NOVEMBER**

The Indian passenger vehicle sales reached an all-time high in November 2023, reaching 53.4 lakh units. This figure reflects a 17 per cent year-on-year growth compared to November 2022 of 3.34 lakh units, reaching a peak of November 2017. Two-Wheelers and Three-Wheelers also reported sales growth of 30.8 per cent compared to November 2022. The SIAM report noted that the Indian auto industry was on track to recover fully from the pandemic that started in 2020-21.

The data, released by the Society of Indian Automobile Manufacturers (SIAM), reflected a remarkable sales figure of approximately 16.23 lakh units in November 2023. This marked a significant growth of 31.1 per cent compared to November 2022. The year-to-date performance was recorded in November 2023, which showed that the data reflect a period when Indian passenger vehicles matched the sales achieved in the same period in 2021.

SIAM President Suresh Neelankavil said, “The data reflect a significant recovery at the end of the fiscal year, demonstrating the resilience of the Indian automotive industry. The growth in November was significant, reflecting a robust recovery that can be attributed to various factors including increased consumer confidence, economic recovery, and government incentives.”

The Supreme Court on Wednesday directed the government to file a plea seeking reconsideration of a APIJ judgment, which held that states granting a permit to a local council to run civil and criminal cases in the city before it expires after six months is unconstitutional. A bench comprising Chief Justice D Y Chandrachud along with Justices A S Oka, J B Patel, Sanjiv Khanna and Sanjeev Khanna also passed an order that the high courts, upon high courts, would automatically stand vacated unless high courts, enabling judicial legislation. He emphasized that it is a fundamental right to speech and expression must not be perceived as a form of derogation for hybrid hearings have been adopted in Delhi, in 15 languages, and hence the hybrid hearings has been established. The bench recommended replacing the ministerial officers with hybrid courts and criminal cases would automatically lapse after six months.

The constitution bench sought the assistance of the Advocate General or the Solicitor General to determine if the judicial functions of high courts cannot be performed by the Central Government or a Government of a State. On December 21, 2018, a three-judge bench consisting of the judges who granted, on high courts, would automat- ically stand vacated unless high courts, enabling judicial legislation. He emphasized that it is a fundamental right to speech and expression must not be perceived as a form of derogation for hybrid hearings have been adopted in Delhi, in 15 languages, and hence the hybrid hearings has been established. The bench recommended replacing the ministerial officers with hybrid courts and criminal cases would automatically lapse after six months.

Defeat: Spats challenge of Congress within India-USA alliance

The Congress party has been facing a series of internal challenges that are seriously affecting its ability to compete effectively within the India-USA alliance. The party has been struggling to maintain coherence and cohesion, amidst growing political differences and disputes among its leaders and members.

John Kerry, the US Secretary of State, has recently visited India and met with various political leaders to discuss the strategic partnership between the two countries. However, the Congress party has been unable to present a united front during these discussions, leading to internal dissent and factionalism.

The party's internal disputes have been exacerbated by the ongoing national elections in India, which have highlighted the party's weak showing and the potential for aegregation. The Congress party has been facing a uphill battle in wining over the voters, who have been disillusioned with the party's performance in recent years.

The internal divisions within the Congress party have also been reflected in its performance in the recent elections, where it has faced a significant decline in its vote share. This has raised questions about the party's ability to rejuvenate itself and compete effectively in the future.

The Congress party needs to address its internal challenges and work towards a unified strategy in order to regain the support of the electorate and emerge victorious in the upcoming elections. Otherwise, it may face a difficult time in the years to come.

_BOBBY HIGH COURT SEeks EXPLAINATION ON ACCUSED HElF FOR 5 YEARS WITHOUT FRAMING CHARGES| SORRY STATE OF AFFAIRS THAT SYSTEM HAS FORGOTTEN APPLiCANT_
Pakistani extends Haj application deadline

Prime Minister Imran Khan has extended the deadline for the Haj pilgrimage applications to December 22. The move has come in response to the increased demand for Haj visas by 136 historical and ancient places that are in Uruzgan province.

Ukraine capital may be declared war zone

The Ukrainian government is considering declaring the capital, Kiev, a war zone. The move comes as the Ukrainian military has seen a significant increase in the number of dead troops and civilians in recent weeks.

Pakistan SC permits military court trials for civilians

Pakistan’s Supreme Court has given the go-ahead for military courts to try civilians. The court’s decision follows a petition from the Pakistan Bar Council, which argued that the military courts were the only way to ensure fair trials for civilians.

President Biden opposes U.S. missile defense system in Europe

President Joe Biden has opposed a U.S. move to deploy a missile defense system in Europe. He said the system could escalate tensions with Russia.

Xi meets Vietnamese PM to strengthen ties

Chinese President Xi Jinping met with Vietnamese Prime Minister Pham Minh Chinh to discuss bilateral relations.

Biden condemns Gaza bombing, urges restraint from Israel

President Joe Biden has condemned the Israeli air strikes on Gaza and urged restraint. He called for an immediate cease-fire and a resolution to the conflict.

Pakistan SC permits military court trials for civilians

Pakistan’s Supreme Court has given the go-ahead for military courts to try civilians. The court’s decision follows a petition from the Pakistan Bar Council, which argued that the military courts were the only way to ensure fair trials for civilians.

A "GLOBAL GOAL ON ADAPTATION" DRAFT EMPHASIZES URGENT SUPPORT FOR DEVELOPING COUNTRIES POST-PARIS AGREEMENT

The IMF Executive Board has completed the first review of Sri Lanka and approved the release of the US$337 million to the IMF's Extended Fund Facility (EFF) programme. Sri Lanka aims to ensure the country has sufficient capacity and doubling energy efficiency to meet its development needs.

The programme continues to support Sri Lanka's efforts to achieve macroeconomic stability and debt sustainability, and the IMF's financial support will help the country to carry out its reforms. Sri Lanka's recent debt restructuring, which aims to alleviate debt burden and support the economy, will also be a key focus of the new agreement.
**DEATH**

**BROOKLYN NINE-NINE**

**STAR ANDRE BRAUGHER PASSES AWAY AT 61**

In the world of show business, news of Andre Braugher’s passing away, announced by the Brooklyn Nine-Nine’s Instagram account, marked a profound loss for fans and colleagues alike.

Braugher, known for his iconic role as hotshot Det. Jake Peralta in the hit police procedural comedy show, was a beloved figure in the entertainment industry. His impact extended beyond his screen presence, as he was admired for his commitment to excellence in both acting and comedy.

Braugher’s career was marked by a variety of roles, from his beginnings in television roles like “Homicide: Life on the Streets” to his role as Captain Ray Holt in Brooklyn Nine-Nine. The show, which ran from 2013 until 2021, was lauded for its diverse cast and its focus on inclusivity and diversity. Braugher’s character, Captain Holt, became a symbol of wisdom and fairness, resonating with audiences around the world.

In addition to his work on Brooklyn Nine-Nine, Braugher had a long and accomplished career in television, film, and theater. His versatility and dedication to his craft made him a beloved figure in the entertainment community.

The news of his passing has been met with an outpouring of tributes and memories from fans and colleagues, highlighting the impact that Braugher had on those lucky enough to know him. His legacy will continue to be celebrated through the episodes of Brooklyn Nine-Nine that bear his mark.

The Hollywood community and beyond mourn the loss of an icon, while also celebrating the life and work of Andre Braugher. His contributions to entertainment will not be forgotten, and his presence will continue to be felt through the work that he leaves behind.
When we attempt to understand the saga of Mahabharata, we come across many books, tales, and films. Here, one author, Anuradha Singh, comes off the page to offer a new perspective to present an ablur novel version of Draupadi, the female protagonist in her book titled “Draupada.”

The fact can be related to the world of mythological writing, and Draupadi has several perspectives on the epic but also allures from the man-made arena driven by male centric notion and hence she should ample amount of light in this regard. draupadi, a story written by the author, Anuradha Singh is a compelling story offering Draupadi’s perspective, her spirit still resides in Jaya, Devi, Sahastra, and her philosophy of women empowerment.

Aiming to the formidable questions of scholars like Elam Narayanan, who has discovered the Draupadi Applaus for her thoughts, the author, Anuradha Singh, has come up with a new interpretation of Draupadi, the female protagonist in her book titled “Draupada.”

The book is also based upon Draupadi’s perception, and her speech. The idea of female empowerment and female-centric role has been highlighted in the book. The book is also lauded for its deep symbolism and it seems that the author has written the book with a strong purpose of society in which the opinion of women is considered and she has dedicated the book to the matters of great import.

But this was not the case with Pandava, who were hardly ever spared Draupadi in high estimation in the book. In the further analysis of the various aspects of this amazing collection of stories, we see 126 women from different walks of life who come forward and take Draupadi at crucial junctures in their lives. Thus, the book becomes the story of Bharatavarsha’s most prosperous kingdom, but it is also mediated by men who are her close relatives, and it is about the silencing of the women in the royal court. She has the audacity to ask them questions, the deep connection she has at any point of time, her life.

When Draupadi comes face to face with the persona of Draupadi at crucial junctures in their lives, she becomes a queen of Bharatavarsha’s most prosperous kingdom, but she is also mediated by men who are her close relatives, and it is about the silencing of the women in the royal court. She has the audacity to ask them questions, the deep connection she has at any point of time, her life.

Iullan supercar marquee Lamborghini has launched its latest hybrid sports car, the Revuelto. According to the brand the Revuelto defines a new paradigm in terms of performance, sportiness and driving pleasure owing to its new architecture, design, better aerodynamic and a new carbon fibre frame concept. Prices for the Revuelto start at Rs. 16.49 crore, ex-showroom.

**DESIGN**
The Revuelto is inspired by aerospace elements, characterized by sculpted surfaces encompassing two lines that start from the front and embrace the cabin and engine, tapering down to the horizontal-chop shaped hood. The shark-fin shaped carbon fibre hood conveys a sense of power and speed. This is matched by the headlamp clusters with 4-shaped daytime running lights framed by aerodynamic black plastic finishers and the air intake to the hood itself. The wide fins on the sides both insert the front wheel arches while the rear one is directly in the boot with aesthetic qualities

**THE FUTURE IS HERE: APPLICATIONS OF GENIUS**
The potential applications of AI are vast as the universe itself. From revolutionizing search engines to transforming education, healthcare, and entertainment, AI is set to make a mark across various sectors. Whether it is an AI model, it’s a tool that will redefine the way we interact with technology.

**CONCLUSION:**
A high-performance hybrid sports car is the latest from Lamborghini in India.

---

**THE AI RENAISSANCE: BEHIND THE AI WINTERS**

All AI’s introductory phase, has risen from its ashes of its previous winters due to periods of stagnation and disillusionment.

Lamborghini’s genius emerges out of hope, signalling the end of these winters and the beginning of an AI renaissance. It’s a story of revival, renewal, and revolution in the AI landscape.

**CHOPTOP: THE PROGESSIVE TO GOLDFINGER**

Before diving into AI, let’s revisit to November 2020: the year when there was the introduction ChatGPT. This AI, a bold new face of AI tools, was introduced into the big blue of the universe in the form of a large language model.

**DATA RELIABILITY ISSUES:**

Generative AI applications, including ChatGPT, scrape information from the internet to answer user queries, raising concerns about data reliability and accuracy. Unlike humans, AI models may lead to potential bias, leading to the misinterpretation and misinformation. However, the absence of bias and the inherent automation of AI models can provide valuable support in streamlining data ownership and usage.

**REGULATORY CHALLENGES:**

The lack of specific regulations governing AI tools creates regulatory challenges. Copying and pasting data provided by AI tools may lead to violations of copyright and data protection laws. Legal notice responses generated by AI tools may constitute copyright infringement due to the dependent use of data, potentially leading to misleading statements and legal consequences for companies.

The need for clear and effective data protection laws is not to be ignored. The storage of data on AI servers poses a risk of cyber-attacks and unauthorized access, resulting in the leakage of sensitive information.

In recent times, global interest in leveraging AI tools in workplaces has increased. This rise is due to the increased use of generative AI tools. However, the promises outweigh the concerns. Imagine an AI that can interpret a painting, understand a melody, or analyze a video, all while conversing with you. That’s the power of AI.

The increased use of generative AI tools in workplaces heightens the risk of data breaches and cybersecurity issues, posing a challenge to protect the creative content from unauthorized use by AI tools and must navigate legal complexities surrounding data ownership and usage.

**THE CHALLENGES AND PROMISES OF GENIUS**

Notwithstanding technology comes without its challenges. With its advanced capabilities, AI also raises questions about accuracy, ethics, and bias. However, the promise outweighs the concerns. Imagine an AI that can interpret a painting, understand a melody, or analyze a video, all while conversing with you. That’s the magic of AI.

**THE MULTIMODALITY CHALLENGE:**

AI tools are not just text-based. They are capable of understanding and responding to different modes of communication, including voice, images, and videos.

**THE ARCHITECT BEHIND GENIUS: DEMIS Hassabis**
The man behind the innovation is Demis Hassabis, who has been a driving force behind the development of AI systems. Hassabis is a multiple award-winning AI researcher and entrepreneur, responsible for developing AI technologies that can create a more holistic, intuitive understanding of the world.

**THE NEXT ASHISHKANDAN**

**INTRODUCTION**

In today’s world where artificial intelligence isn’t just about processing words and sentences but creating entire ecosystems of human experience, AI tools have evolved significantly.

This is not a snippet from a web article, it’s reality. AI tools, whether you choose to embrace them or not, are an integral part of our daily lives.

In today’s article, let’s embark on a journey through the AI universe, exploring how it’s shaping the world around us.

**THE CHALLENGES OF AI:**

While AI tools offer immense benefits, they also present challenges. AI tools can sometimes misinterpret human intentions, leading to errors or unintended outcomes. Moreover, the reliance on AI tools can limit human creativity and decision-making.

**THE PROMISES OF AI:**

On the other hand, AI tools offer unparalleled opportunities for innovation and productivity. They can help streamline processes, automate repetitive tasks, and enhance human capabilities. In summary, AI tools are a powerful tool for achieving a better future.

**THE FUTURE IS HERE: APPLICATIONS OF GENIUS**

The potential applications of AI are vast. They can be used in various fields, including healthcare, education, and entertainment. AI tools can revolutionize the way we interact with technology and enhance our daily lives.

**CONCLUSION:**

AI tools have the potential to transform industries and improve our lives. However, it’s crucial to address the challenges of AI tools while embracing their promises.

**THE NEXT ASHISHKANDAN**

**THE AI RENAISSANCE: BEHIND THE AI WINTERS**
